Table of Contents

Esri resources for your organization

Course introduction

- Course introduction
- Course goals
- Installing the course data
- Training Services account credentials
- Icons used in this workbook
- Understanding the ArcGIS platform

1 Introduction to Insights for ArcGIS

- Lesson introduction
- Data analysts and GIS professionals
- Insights for ArcGIS overview
- Exploring data potential
- Approaches to scientific inquiry
- Data sources
- Exercise 1: Create a new workbook
 - Sign in to ArcGIS Online
 - Create a new workbook and add a feature layer
 - Add Excel files
 - Rename datasets
 - Explore attributes
- Deploying Insights for ArcGIS
- Lesson review
- Answers to Lesson 1 questions

2 Adding and displaying data

- Lesson introduction
- Location field role
- Enabling location on a table
- Table relationships
- Creating a table relationship
- Styling data
- Exercise 2: Enable location and create relationships using tabular data
 - Create a map card
 - Enable location on a dataset
 - Create a table relationship
 - Style by category field

Style by numeric field

Make a heat map

Lesson review

Answers to Lesson 2 questions

3 Exploring and visualizing data

Lesson introduction

What is in your data?

Field roles

Chart types

Using charts to answer questions about data

Exercise 3A: Explore storm events using various cards

Add storm event data for the United States

Create a summary table

Explore climate regions using charts

Summarize multiple fields

Explore events by season and climate region

Explore events using a time series

Explore events using a data clock

Explore events by type

Selecting features

Filtering data

Exercise 3B: Work with subsets and selections

Add storm event data for the United States

Create a dataset filter

Use a card filter

Use cross filters

Make a selection on the map

Make a selection on a card

Lesson review

Answers to Lesson 3 questions

4 Spatial analysis

Lesson introduction

Analysis capabilities

Analyzing customers and distributors

Exercise 4: Perform vulnerability analysis

Duplicate the page and add data

Use a spatial filter

Spatially aggregate storms and counties

GeoEnrich counties with a population density variable

GeoEnrich counties with demographic variables

- Calculate z-scores
- Add and calculate a field
- Evaluate variable relationships using a scatter plot matrix
- Visually analyze storm events with vulnerability

Lesson review

Answers to Lesson 4 questions

5 Sharing your insights

Lesson introduction

What you can share

Sharing your work

Exercise 5: Share storm analysis results

- Share a dataset

- Share a page

- Share a model

- Use a shared model with different data

- Share a workbook

- Access shared content on ArcGIS Online

Deployment for your organization

Lesson review

Answers to Lesson 5 questions

Appendices

Appendix A: Esri data license agreement

Appendix B: Answers to lesson review questions

Appendix C: Additional resources
